- Do not scrub with steel balls and other chemical solutions (strongly corrosive).
- Do not place the heat preservation container near a heat source such as a stove to prevent the plastic parts from being deformed by heat.
- Please handle with care, do not invert, squeeze, impact, avoid deformation and depression of the container, reduce insulation performance.
- When placing ice cubes, do not force large ice cubes that exceed the size of the mouth of the container into the container.
- Do not store tea, juice, or dairy products in the container for a long time (more than 1 day) to prevent deterioration and odor.
- Please check the bottle liner and cap frequently. If the plug is found to be broken or worn, it should be replaced immediately. Avoid hot water leaking and scalding the human body.
- Do not expose children to insulated containers containing hot water or other foods to avoid burns.
